**Subject: In the Matter of LightSquared Subsidiary LLC Request for Modification
of its Authority for an Ancillary Terrestrial Component; SAT-MOD-20101118-
00239**

Dear Ms. Dortch:

We are the co-owners of Capitol Guard & Patrol, Inc, a Phoenix-based security business. However, neither of us live in Phoenix, so having a reliable wireless network is very important to our business. We recently learned about a company called LightSquared that is currently working with the FCC to develop a new 4G-LTE broadband network. We support this project because it will allow more competitors to enter the broadband market, which will make broadband wireless more accessible and more affordable for businesses like ours.

We also understand that LightSquared's network would be the first to combine ground-based cell towers with satellite communications. This would allow security guards, like those our company provides, to maintain communications in the case of natural disasters or other emergencies even if terrestrial cell towers and landlines systems are damaged or destroyed. This would be invaluable to our business.

Therefore, I ask that you support the FCC's process and work to expedite the launch of this important new service from LightSquared.

Sincerely,

**Karen Cooke
